

# AutoValue AI

## System Requirements: -

- Internet Connection
- Modern Web Browser
  - Google Chrome
  - Microsoft Edge
  - Firefox, etc.

## 1. Starting The Application: -

- Open your preferred web browser.
- Visit: <https://autovalueai-mrii.onrender.com/>
- Wait for the website to load.
  - **NOTE:** Since the application is hosted on Render's free tier, the first request may take **30–60 seconds** if the server is sleeping. After that, it works normally.

## 2. How to Use: -

### Step 1:

Open the website.

### Step 2:

Go to the **Car Details Form**.

### Step 3:

Enter all required vehicle information

## **Step 4**

Click Predict Price.

## **Step 5**

The trained Machine Learning model processes the information.

## **Step 6**

The estimated resale value of the vehicle is displayed.

## **4. Expected Output**

After successful prediction, the application displays:

- Estimated Selling Price
- Entered Vehicle Details
- Prediction generated using the trained Random Forest Regression model

## **5. Error Handling: -**

If incorrect or incomplete information is entered:

- Fill all mandatory fields.
- Enter only valid numerical values.
- Refresh the page if needed.
- If the server is waking up after inactivity, wait about one minute and reload the page.

## **6. Closing the Application: -**

Simply close the browser tab.

No data is stored on the user's system.
